## ABOUT US

Universal Septic is a state certified SBE/MBE licensed and insured septic company and has over 25 years of experience in the environmental field. We provide full service septic pumping, inspection and repair to over 5,000 residential customers and to 500+ commercial clients.

Our company purchased Santini Septic in 2016, and together we operate under a single management team and serve a wide geographical area. We have two office locations, three tanker trucks, and five specialized pump stations to handle large commercial jobs. Our fleet is also capable of residential septic system design and installation, pump chamber installation, and pump repair.

The owner brings over 20 years of waste disposal experience and over a decade in professional septic services and he and his team understand the frequent dangers that plague septic tanks and cause them to back-up, become toxic, or completely fail.

Universal Septic services Fairfield County and parts of New Haven and Litchfield Counties and specializes in 24-hour commercial emergency care for septic backups, overflows, and more.

*The USA Olympic U12 Boys Team. Sponsored by Universal Septic. Lander Sotil is among the boys selected to represent the USA in the 2017, 2018 and 2019 International Tournament in Azores, Portugal. (not all team members present for photo)*

## **RAFAEL M. SOTIL**

Rafael Sotil, has over 20 years of experience in the environmental field and over a decade in professional septic services.

Sotil began his career at the Department of Health, Division of Environmental Health Laboratory for the town of Greenwich. He was there for 5 years and in 1995, became the Superintendent for the Greenwich Department of Public Works in the Hazardous / Waste Disposal Division and remained there for 10 years. Sotil was Co-Chairman for the town of Greenwich Emergency Response Program acting as a liaison between Public Works and various governmental emergency agencies. He later became Co-owner of Pupper Septic and its affiliates: Tashua Septic, Mr. Septic, Blue Moon Septic, C&S Septic and AMS Septic which eventually lead him to become the founder of Universal Septic.

With a Bachelor's Degree in Environmental Science from the University of New Haven and two decades of experience with financial and environmental strategies, his expertise led to creating a very successful business with thousands of loyal customers throughout Connecticut.

## **FAMILY BACKGROUND**

Sotil's father, Ricardo (Lasa) Sotil brought up his four sons playing jai-alai. The Sotil family made a name for themselves in the sport as each generation was noted not only for their strength, victories, and world cups, but also for their allegiance to the game of jai alai and the defense of players' rights. This determination and ferocity has been passed down through the Sotil family, and today lends itself toward a strong respectable business that continues to grow each year.

# SERVICES

Residential and commercial services include septic tanks, grease traps, dewatering pits, septic system design and installation, and pump chamber installation and repairs. We operate with three main tanker trucks and have access to twenty-two more through our affiliates, so we can complete any of these jobs in a timely manner.

## **COMMERCIAL SERVICES**

Universal Septic is registered to unload in an environmentally safe manor in five sewer treatment plants in Bridgeport, Danbury, Naugatuck, Ridgefield and Greenwich. This allows a rapid response time for emergencies.

We specialize in large commercial pumping jobs as our trucks have steel tanks that can hold 5,000 gallons of waste. This avoids multiple trips (and its associated expenses) to treatment plants. These trucks also have heavy duty pump systems and are capable of 30-40 foot lifts for complex jobs, such as town pump stations and lake areas that require an uphill draw of 40 feet. This is the same style lift that is used on cruise ships!

## **TOWN PUMP STATIONS & SEWER PLANTS**

Town pump stations are typically neglected, need constant repairs, and are often considered to be in emergency states. Their tanks are 30-40 ft. deep which makes it hard to thoroughly clean the debris and build up without the proper equipment. This is the primary reason the stations are not maintained correctly and only get attention when an emergency occurs.

Our company specializes in properly maintaining the town's pump stations because we use high powered pumps to ensure the tanks are fully cleaned and the station is operating efficiently. Through our affiliates, we can also offer pump inspection, re-installation and a regular maintenance program. Maintenance programs can be developed based on each individual and unique situation.

# COMMERCIAL

We serve over 500 commercial customers in Northwest and Southwest CT and beyond.

*Our Company is now taking on new commercial accounts in lower Fairfield and New Haven Counties, as well as expanding into Westchester and Putnam Counties in New York.*

# UNIQUE JOBS

## TOWN PUMP CHAMBERS, STATIONS & SEWER PLANTS

### TOWN OF GOSHEN

Our company recently did emergency work for the Town of Goshen. We worked 24 hours around the clock for 60 straight hours. We moved 100,000 gallons a day until the town was able to get a heavy duty portable pump installed on their main pump station.
